DETAILED ACTION

1. The amendment filed 12/8/2005 has been entered.

Response to Arguments

2. Applicant's arguments, see "Remarks", pages 5-6, filed December 8, 2005, with respect to claims 1-3 have been fully considered and are persuasive. Therefore, the rejection of claims 1-3 has been withdrawn.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: the closest art of record (Makower, U.S. Pub 2002/0184507) teaches a similar method for identifying a user, but does not teach or suggest in detail the specific arrangement of peer groups and identifying information as recited by the independent claims (See Paragraphs 118-129 on pages 61-64 of Applicant's specification for an enabling disclosure). Specifically, the closest art of record teaches the use of an authentication peer group to authenticate a user (Makower, Paragraph 20, 23), but does not teach an authentication peer group capable of authenticating a user with a particular identification randomized ID. Examiner notes that since Applicant specifically defines an 'identification randomized ID' as a pseudo-random identifier (See paragraph 119 on page 61 of Applicant's specification), the methods of user authentication taught by Makower (See paragraph 32) cannot be considered to be an identification randomized ID. Furthermore, the only use of a identifier taught by Makower is used to authenticate web server 20, rather than the user.

Accordingly, taking into account Applicant's specification, the closest art of record fails to teach all limitations of the claimed invention.

4. **Claims 1-3** are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
